The Humanization of Health Sciences through Innovation in Health Professions Education: The Rationale, Trends, Obstacles and Ways Forward for Integrating the Humanities and Social Sciences into Health Sciences Curricula

Organisateurs:

- Gerber Berna, University of Stellenbosch, Mrs, Senior Lecturer, Head of Division
- Pentecost Michelle
- wainwright megan, University of Cape Town, Postdoctoral Research Fellow
- Cousins Thomas
- Cloete Lizahn
- Mukumbang Ferdinand
- Singh Guddi

Exploring whether and how the integration and expansion of the humanities and social sciences into medical and other health sciences curricula can help to produce health professionals and health researchers that are responsive to the health, development and social challenges of the 21st century.
