THE BROCHER FOUNDATION

This non-profit foundation was created under Swiss private law by Mr and Mrs Jacques and Lucette Brocher. Its purpose, since the demise of its founders, is to host scientists and experts in the ethical, legal and social implications of the development of medical research and biotechnologies in the Hermance domain.

The Foundation encourages multidisciplinary research around this new field of research strongly linked to society by involving law, anthropology, history, bioethics, philosophy ... Its Board relies on a Scientific Committee composed of international experts.

Since its launching in 2006, the Brocher Foundation has backed the publication of hundreds of books and articles which are the fruits of the scientific stays and events.

Key figures

50 Visiting Researchers per year	+150 Books and scientific papers published annually
+800 International leading experts each year for scientific events	+30 Partner worldwide universities and international organizations
~300 applications to the annual calls for proposals	16 Swiss and international experts in our multidisciplinary scientific committee
